# Danilo Aleixo

## Full-Stack Engineer

[danilo\\_aleixo@hotmail.com](mailto:danilo_aleixo@hotmail.com) - São Paulo, SP - Brazil

## SKILLS

- Experience with Javascript frameworks and scalable architectures patterns.
- Strong personal communication skills.
- Comfortable with agile methods and test driven development techniques.

## EDUCATION

### Universidade de São Paulo, Brazil - BS, Computer Science

JANUARY 2012 - DECEMBER 2017

- Scientific Initiation scholar of CNPq during one year that leads to the publication of the research "Event Simulator for Spatial Systems"
- Agile coach at a web and mobile project for the university (Ruby on Rails)

## EXPERIENCE

### Colmeia, Brazil - Tech Lead / Full-Stack Developer

APRIL 2017 - TODAY

I have a small team of developers and designers, together we delivered the whole client app. The application was developed with Angular, using Typescript, Sass and building unit tests. I also helped architecture and develop the backend application which works with NodeJS using MySQL, Redis, SocketIO and RabbitMQ in the stack along with Google Cloud Platform products.

### Itaú BBA, Brazil - Business Analyst Intern

AUGUST 2014 - AUGUST 2016

Worked in business analysis and agile project management for some of bank's foreign units as New York, Nassau/Cayman and London, developing front-end mock-ups for customers.
